

Global E-Sports Stats

09.04.2016

Ibrahim Mercado CEO / FOUNDER

Global E-Sports Stats .

Overview

Provide gamers help on keeping up with their friends or competitors on the latest stats depending by games and or console. Since gaming has had a rise in the Sport community some players would like to see stats from their favorite games to see how they should be playing . That's were Global E-Sports Stats comes in with a wide variety of games and many more coming soon.

Goals

1. Load data from each games API's and display to user what they requested.
2. Clean UI/UX look.
3. Display News thru IGN

4. Display stats from games from their respective slots.

Specifications

All game stats are up to date with our apis and more games will be available with the updates that will be available after choosing the console of choosing and games. You will also get news pulled from IGN news. Many more other updates will be hinted for time constraint.

Milestones

I. Display Updates and Stats from API

Showing updates and stats from the games API and be able to be modified or styled.

II. Display News from IGN.

Have a stylish look for the news pulled from IGN for user pleasure.

III. Have a successful clean authentication process and stored on server

Step by step app function

IV. Display signup box

User will have the ability to sign up thru google or by the page itself and the info will be stored in mysql.

V. After signing up the page will redirect to main html.

After the info is submitted the page will redirect to the main html where they can begin their search

VI. After redirect can navigate and click on the different nav buttons which views stats

The user can then navigate different the top dropdown menus from different consoles and after clicking different games that show their stats will pop down.

VII. Also user would be able to get certain news from IGN News that the user can access on the News tab

After clicking the user will be redirected to a IGN News pull site were the user if they please can access IGN News for other articles if they choose

VIII. Also Main html will include a clean image of the company and a brief description of its purpose

The Description will talk about our purpose with esports game stats and provide the user with instructions on what to do and how to use the site
